

GROWTH STRATEGIES

Relative Strength ETF Portfolios

Innovation designed to respond to changing market conditions.

This is a strategy that seeks to reap the benefits of good market performance, while also putting the defense on the field when a market segment trends down.

Strategy Highlights

DEMAND DRIVES PERFORMANCE

Our Relative Strength series uses Point-and-Figure technical analysis to reveal market demand trends. We believe it is the irrefutable law of supply and demand – even more than company fundamentals – that drives market performance.

ETF PORTFOLIOS

This classic technique of Point-and-Figure analysis, along with cost-effective exchange traded funds (ETFs), is used to deliver portfolios that are designed to address different kinds of investor goals.

MAINTAIN FOCUS

While markets are unpredictable, NewSquare Capital's consistent methodology strives to reduce stress when markets decline and helps you maintain focus on long-term investment outcomes.

Ability to diversify across six asset classes

By consistently tilting portfolios toward areas of high demand and away from low demand, the relative strength approach seeks to balance growth objectives with risk management considerations.

The Relative Strength Advantage

The NewSquare Relative Strength series is a suite of portfolios designed for investors seeking long-term growth opportunities, but who also want a systematic way to manage risk in down markets. Investing in cost-effective, tax-efficient ETFs, the Relative Strength series uses a rulesbased methodology that aims to align with the strongest intermediate- to long-term trends in major asset classes and sectors. Its goal: pivot between wealth accumulation (offense) and wealth preservation (defense) by dynamically tilting toward the strongest areas of the market.

What to expect as an investor

A disciplined approach that seeks to:

- Reduce the downside
- Catch intermediate- to long-term growth trends

“Investors may benefit from strategies that are designed to play both offense and defense. We believe that is best done by focusing on true market demand.”

—RYAN L. KIRK, CFA, HEAD OF PORTFOLIO MANAGEMENT

Investing in any investment vehicle carries risk, including possible loss of principal, and there can be no assurance that any investment strategy will provide positive performance over a period of time. The asset classes and/or investment strategies described in this publication may not be suitable for all investors. While diversification through an asset allocation strategy can help manage overall portfolio risk and volatility, it does not promise any level of performance or guarantee against loss of principal. While our trading strategy seeks to apply relative strength analysis and point-and-figure techniques to determine when to buy or sell securities, there is no assurance that this approach will result in profit or protect against loss.
